

MAY 15 – MAY 30 · 15 DAYS

15-Day Full Stack Web Development Program

From Zero to Live Website in 15 Days. No coding experience? No problem. In 15 days, you'll build and launch your own full stack website — guaranteed.

👉 "No coding experience? No problem. In 15 days, you'll build and launch your own full stack website — guaranteed."

What You'll Achieve

By the end of this program, you will design, build, and deploy a complete full stack website on your own. This intensive 15-day journey takes you from writing your first line of HTML to launching a live, portfolio-ready application on the internet. Whether you're switching careers, looking to freelance, or simply want to build real skills fast — this program is built for you.

15

Days of Training

Intensive, hands-on learning from day one

5

Phases

Structured progression from basics to deployment

1

Live Website

Your own deployed full stack project

100%

Portfolio-Ready

Real-world project to showcase your skills

Build from Scratch

Learn to create websites from the ground up with HTML, CSS, and JavaScript

Frontend + Backend

Understand both sides of web development clearly and confidently

Deploy Live

Host your website on the internet and share it with the world

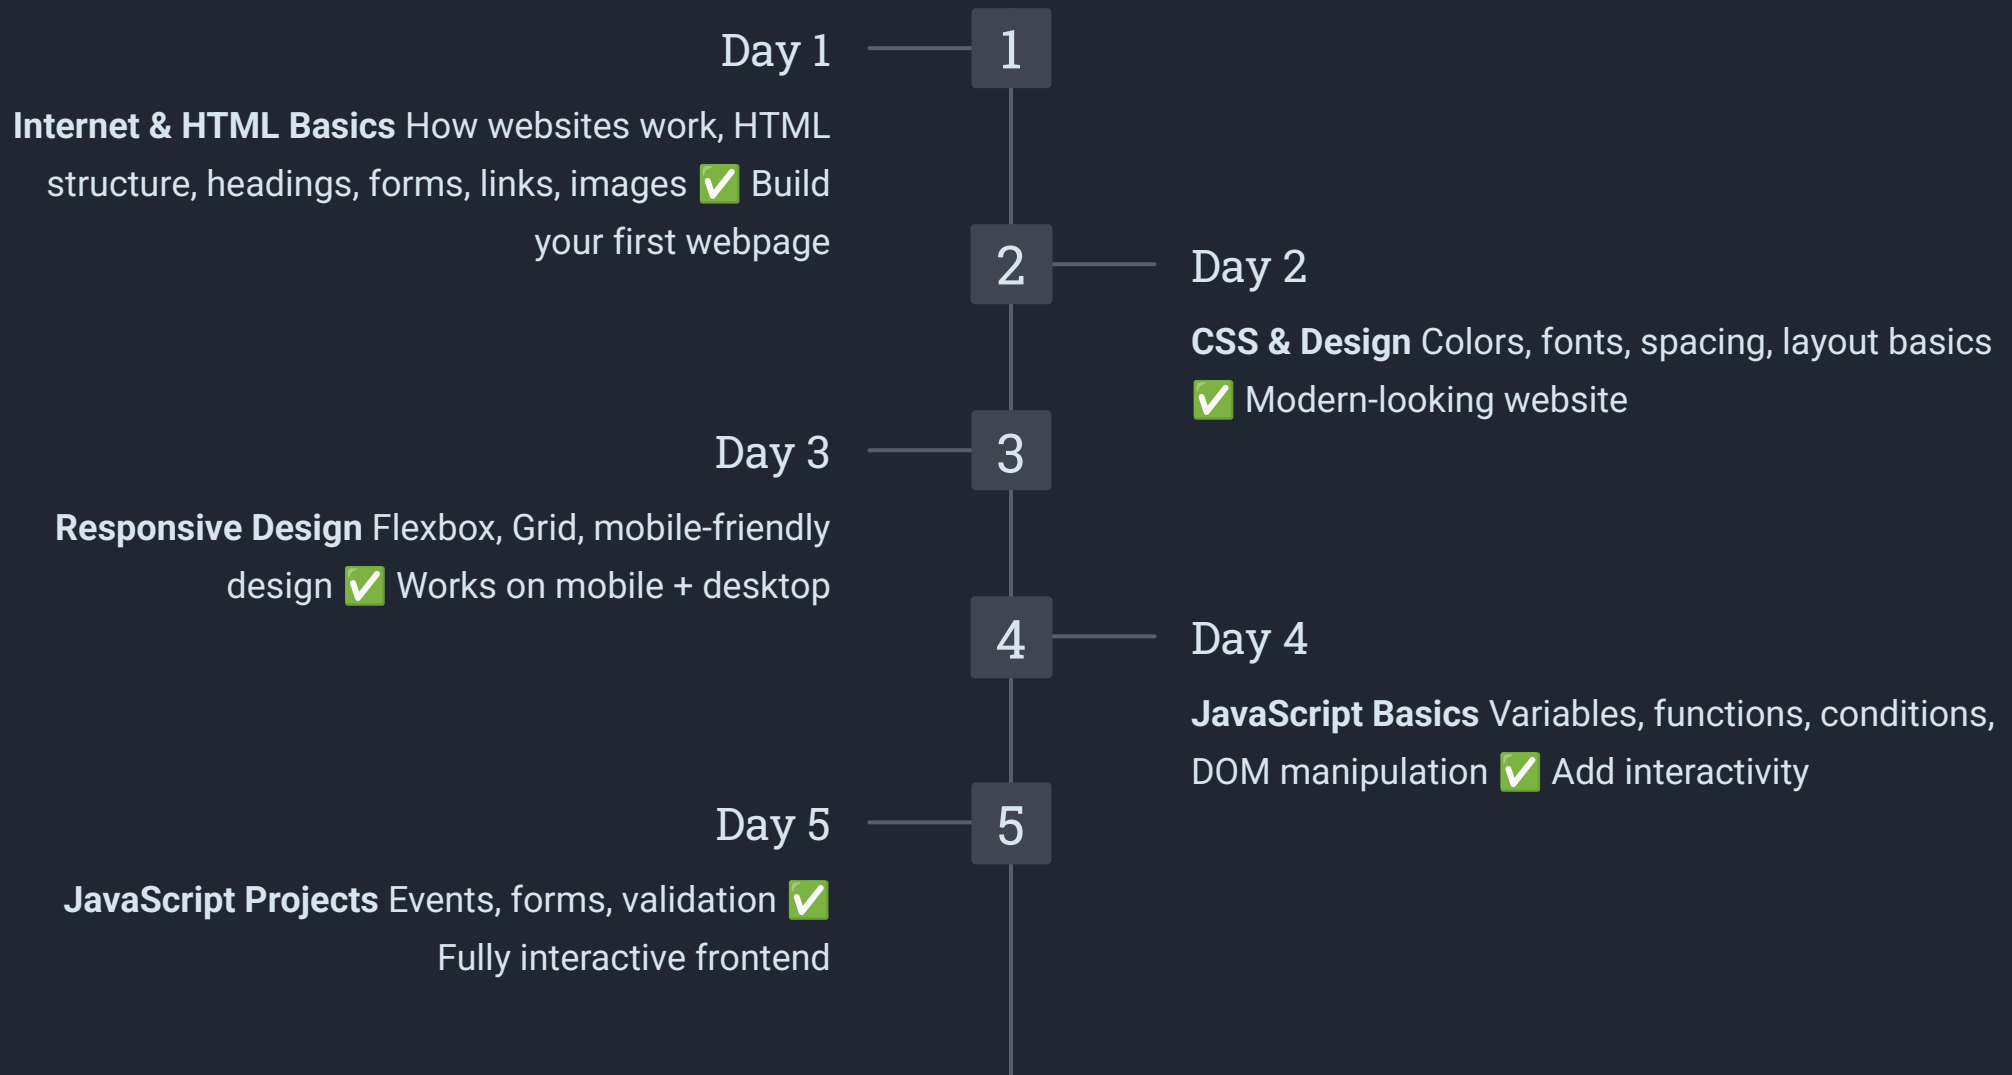

Career Ready

Start freelancing or apply for internships with a real project under your belt

Frontend Foundation

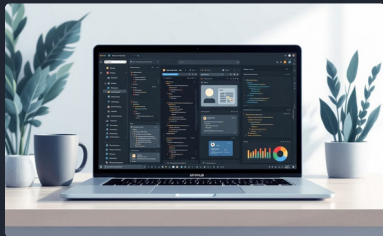

Start with the absolute basics. In just 5 days, you'll go from understanding how the internet works to building a fully interactive, mobile-friendly website. No prior experience needed — we build your foundation brick by brick.

Modern Frontend with React

Now that you have the fundamentals down, it's time to level up. Learn Git for version control, then dive into React — the most popular frontend library used by companies worldwide. By Day 8, you'll be building dynamic, real-world user interfaces.

Day 6 — Git & GitHub

Master version control and upload your projects online. Your work becomes trackable and shareable with the world.

- Version control fundamentals
- Upload projects to GitHub
-  Your work is online & trackable

Day 7 — React Basics

Get introduced to components and JSX. Build your very first React application from scratch.

- Components & JSX
- React project structure
-  Build your first React app

Day 8 — React Advanced

Take your React skills further with props, state management, and API basics. Create dynamic UIs like the pros.

- Props, state, API basics
- Dynamic UI patterns
-  Create dynamic UI (real-world apps)

Backend Development

The backend is where the magic happens behind the scenes. Learn to build servers, create APIs, and work with real databases. By Day 11, you'll have your own backend running and storing real data.

1

Day 9 — Node.js Basics

Understand backend concepts and create your first server. The engine behind your application comes to life.

✓ **Your own backend running**

2

Day 10 — Express.js

Build APIs and set up routing. Express makes your server powerful and organized.

✓ **Build a REST API**

3

Day 11 — Database (MongoDB)

Learn CRUD operations — Create, Read, Update, Delete. Store and manage real data like a professional.

✓ **Store & manage real data**

Full Stack Integration

This is where everything comes together. Connect your React frontend to your Node.js backend, fetch live data, and build a secure login system. You'll have a fully functional, user-authenticated full stack application.

Day 12 — Connect Frontend + Backend

Integrate your API with the frontend. Fetch and display real data from your database in your React app.

- API integration
- Fetch & display data
- ☒ Fully connected full stack app

Day 13 — Authentication

Build a complete Login / Signup system. Secure your application and manage user sessions like a real product.

- Login / Signup system
- User sessions & security
- ☒ User-based application

Connect
Frontend

Add
Authenticatio
n

These two days transform your separate frontend and backend into one unified, secure, fully functional application.

Deployment & Final Build

The finish line is in sight. Deploy your application to the internet so anyone in the world can visit it. Then spend your final day building ONE complete, polished project that you can proudly add to your portfolio.

Day 14 — Deployment

Host your frontend and backend on the internet. Your website goes LIVE for the world to see.

✓ **Your website is LIVE on the internet**

Day 15 — Final Project

Build ONE complete project from scratch. Choose your path and make it yours.

- Portfolio Website
- Blog Platform
- Mini E-commerce Store

Live Website

Deployed and accessible to anyone online

Portfolio-Ready

A real project to show employers and clients

Full Stack Confidence

You built it yourself — end to end

Program Schedule & Pricing

Two flexible learning formats to fit your needs — choose what works best for you. Both options cover the exact same curriculum and deliver the same results.

Offline (In-Person)

Learn in a physical classroom with direct instructor guidance and peer collaboration.

- **Full Program:** ₹15,000
- **Cutdown Program:** ₹10,000
- Hands-on instructor support
- Peer learning environment
- Structured daily schedule

Online (Remote)

Learn from anywhere with live sessions and recorded content for flexible access.

- **Full Program:** ₹10,000
- **Cutdown Program:** ₹8,000
- Live + recorded sessions
- Learn from anywhere
- Same curriculum, flexible pace

Start Date

May 15, 2025

End Date

May 30, 2025

Duration

15 Intensive Days

Outcome

Live Full Stack Website

What Students Will Achieve

This program is designed for aspiring web developers and career switchers with basic computer literacy. No prior coding experience required — just curiosity and commitment. By the end of 15 days, you'll have the skills and a live project to prove it.

→ Build Websites from Scratch

Start with a blank screen and end with a fully functional website — you'll know every line of code you wrote.

→ Understand Frontend + Backend Clearly

No more confusion. You'll understand how the client and server communicate, and how data flows through a real application.

→ Create Real-World Applications

Build projects that solve real problems — not just toy examples. Your final project will be something you'd actually use or show a client.

→ Deploy Live Projects

Your website won't just live on your laptop. You'll deploy it to the internet so anyone can visit it — including potential employers.

→ Ready to Freelance or Intern

With a live project and solid fundamentals, you'll be ready to start taking on freelance work or apply for internships immediately.

Your 15-Day Journey Starts May 15

"No coding experience? No problem. In 15 days, you'll build and launch your own full stack website — guaranteed."

Don't wait for the perfect moment — this is it. In just 15 days, you'll go from zero to a deployed, portfolio-ready full stack website. Whether you choose offline or online, full or cutdown, the outcome is the same: **real skills, a live project, and the confidence to take the next step in your career.**

Starts May 15

15 days, ending May 30

Online from ₹8,000

Full program ₹10,000

Offline from ₹10,000

Full program ₹15,000

Live Website Guaranteed

Portfolio-ready project

Spots are limited! Secure your place in the May 15 cohort today and start your web development journey. Whether you're switching careers, looking to freelance, or just want to build something real — this program is your launchpad.
